EDUCATION

Bachelor of Technology in Electronics & Communication Engineering *Expected 2028*

Maulana Abul Kalam Azad University of Technology (MAKAUT), Kolkata, West Bengal

Gargi Memorial Institute of Technology

Secondary and Higher Secondary education from WBCSHSE board *Graduated from high school at 2024*

Maulana Abul Kalam Azad University of Technology (MAKAUT), Kolkata, West Bengal

Namkhana Narayan Vidyamandir

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, HTML, CSS, JavaScript, JAVA (currently learning)

Data Science & ML: Pandas, NumPy, Scikit-learn (Random Forest, Logistic Regression), Matplotlib, Seaborn, Plotly

Tools & Technologies: Git/GitHub, React, Node.js, n8n, Supabase, Firebase (basic auth), Vercel/Netlify Deployment, Jupyter, VS Code,

Currently Learning: TensorFlow, PyTorch, Cloud Deployment (AWS/GCP)

PROJECTS

IPL Prediction Engine | *Python, Flask, Scikit-learn, Pandas, TailwindCSS* | [GitHub](#)

- Built a production-grade ML web application predicting IPL match outcomes using Logistic Regression trained on 150,000+ ball-by-ball historical records, achieving 73% prediction accuracy across 200+ test matches
- Engineered 15+ features from raw delivery data including strike rates, wicket patterns, venue-specific performance, and head-to-head records to capture team strength dynamics
- Designed a modular architecture with separate training and inference pipelines; deployed a Flask REST API serving real-time predictions

Weather Forecast Predictor for Kolkata | *Python, Random Forest, Plotly, OpenWeatherMap API* | [GitHub](#)

- Developed a 7-day multi-variable weather forecasting system predicting max/min temperature and humidity using Random Forest Regression on 5+ years of historical climate data, achieving RMSE of 3°C
- Integrated live OpenWeatherMap API for real-time data injection; implemented secure credential management using environment variables and automated daily model retraining
- Created an interactive Plotly dashboard with confidence intervals and historical comparison, processing 1500+ data points for visualization

Campus Career Copilot | *Next.js, React, Gemini, Supabase, Firebase* | [GitHub](#)

- Built an AI-powered placement-readiness platform for engineering students and Training & Placement Officers, offering resume evaluation, skill-gap tracking, guided learning journeys, and cohort analytics
- Used AI to analyze uploaded resumes and generate a readiness score along with a personalized summary of strengths and priority gaps
- Designed structured, step-by-step skill-building journeys to help students close gaps identified in their evaluation
- Implemented user authentication and role-based dashboards for students and placement officers using Firebase and Supabase
- Real-World Impact: Placed in the top 6 of 40 teams at an intercollege hackathon; helps students and TPOs track placement readiness at scale

LEADERSHIP & IMPACT

- Project Team Lead (2 teams, 8+ members total): Coordinated project deliverables, sprint planning, and code reviews during a 3-month Data Science course;
- Event Organizer: Hosted Smart India Hackathon internal round (150+ participants), club opening ceremonies, and 3 technical workshops reaching 200+ students; managed logistics, judge coordination, and sponsorship outreach
- Campus Ambassador, KSHITIJ Program: Drove student engagement in technical competitions; recruited 30+ participants to join our programs
- JIS Debate & Literacy Club Member: Contributed to organizational planning for literary events and inter-college competitions

CERTIFICATIONS & ACHIEVEMENTS

- 3rd Place, College Hackathon — Built a real-time anomaly detection system in 24 hours; judged on innovation and technical execution
- Data Science with Python, 3-Month Intensive Program — Completed 120+ hours of hands-on training covering ML algorithms, statistical analysis, and deployment; led 2 capstone projects
- Generative AI Workshop, Upskill (8 Hours) — Gained foundational knowledge in LLMs, prompt engineering, and AI ethics
- Hackathon Participation — Competed in 5+ national/international hackathons including Smart India Hackathon qualifiers
- Hack2UK — Participated and made it to one of top 6 teams.

ADDITIONAL INFORMATION

Languages: English (fluent), Bengali (native), Hindi (fluent) | **Interests:** Competitive chess (1000+ rating), open-source contribution
